PROTECT OUR PIPES!

Flushable Wipes

Do **NOT** flush baby wipes or other "flushable wipes." They clog pipes and back up sewage into your house and the whole neighborhood!

Grease

Pouring grease, oil, and other fatty liquid will solidify in the city's pipes causing sewer backage and expensive repairs that you have to pay for!

Harsh Chemicals

Using certain chemicals can corrode your pipes and create leaks that are very expensive to repair! Please use hot water and dish soap to clean your sink.

Why are they not flushable?

"Flushable wipes" do not break down like toilet paper, instead they clump together creating blocks. Flushable wipes are labeled "flushable" because they can go down the drain, but that doesn't mean they can go down the pipes.

Do **NOT** pour grease down drains. Do **NOT** flush "flushable wipes." Do **NOT** use harsh chemicals to clean your drains. **DO** pour grease into a container and throw it away. **DO** throw away wipes. **DO** use hot and soapy water!
